Election/Restrictions

Applicant's election of Group I, claims 1 and 2 is noted. The invention is drawn to many different compounds which are encompassed by claims 1 and 2. The compounds vary distinctly in their structures and functions. Thus, an individual search is required of each individual compound. Therefore, as part of electing one of the groups as the elected invention (which applicant has already done), Applicant is required to elect a specific compound, to which the elected invention will be examined on the merits as drawn to; as well as identifying those claims to which the elected compound is drawn. This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.

Claims 11 and 12 are also considered to be non-elected since they constitute different groups of inventions. As stated in the previous office action, they do not share a special technical feature as shown by WO 9637514. Claims 11 and 12 also show subject matter which is properly restrictable under this section.

Thus, claims 4-12 are withdrawn from further consideration by the examiner as being drawn to non-elected subject matter.
